

MultiMasz

MAGNETIC COOLANT SEPARATOR

Manufacturer: MultiMasz Poland

■ APPLICATION

MMA separators are designed for work primarily on grinding machines, and other machines tools and devices with water-based coolants, or straight cutting oils, to extend the life cycle of machine tools and the cooling fluids. MMA Separator provides increased productivity with less downtime for machine coolant replacement. It is the best solution to perform the machining accurately due to the quality of the surface and the accuracy of the final dimensions.

■ MODE OF WORK

The MMA magnetic separators are designed to clean the cooling liquids from filings, chips and other metallic impurities arising in the cutting process.

■ TECHNICAL PARAMETERS

Voltage 400/230V/50Hz

TYPE	TRANSMITTING CAPACITY [l/min]	ROTATION SPEED OF THE DRUM [rpm]	POWER [kW]	DIMENSIONS [mm]	WEIGHT [KG]
MMA-63a	63	4,9	0,18	412x370x402	30
MMA-100a	100	4,9	0,18	502x370x402	40
MMA-160a	160	4,9	0,18	657x370x402	52
MMA-250a	250	4,9	0,18	835x370x402	68
